

HOW DOES AYRTON CONTRIBUTE TO SUSTAINABLE DEVELOPMENT?

v6.0 21.03.2025

AYRTON

In 2019, Ayrton embarked upon a journey to be better. Our goal has been to understand our environmental impact, and to identify how we could drive changes in our organization to mitigate the impact.

We have effected positive changes over the last few years. However, it is never enough. In addition to the identifiable progress made, we are committed to full-scope carbon footprint accounting, with our first report completed for the year 2021. Having reported for three consecutive years from 2021 to 2023, this commitment has become a standard practice for tracking emissions over time and identifying key areas for decarbonization. In collaboration with our suppliers, we are also integrating circular economy principles into our future business strategy.

This will be a long and often times frustrating journey, but doing nothing is not an option. It has become clear that there is no single fix and it will take a variety of approaches to create long term meaningful change, for which accountability and transparency are always the key.

It's important to highlight the steps Ayrton has, and continues to take, to be as environmentally-conscious and responsible as possible. As always, should you have any comments, ideas or concepts to share with us, please do send them to gogreen@ayrton.eu.

Cheers,

Christopher Agius Ferrante

HOW DOES AYRTON CONTRIBUTE TO SUSTAINABLE DEVELOPMENT?

These are the first steps on our journey to improve our ecological credentials, in all areas of our business. We will publish regular reports and updates on our progress and share our learnings as well as our success.

100% Renewable

Since June 2022, the power needs of Ayrton's French HQ have been entirely covered by a 100% renewable energy tariff supplied by Ekvolt.

Eco-friendly materials
environmentally certified metals
for our product

CO² Missions Reports
completed for 2021-2023 with
carbon consultancy Greenly

Reducing Impact

Using
Biodegradable
pallet wrap and pellets

Reusing
Robust Plastic Pallets
for shipping & for storage

Engaging

No Single-use Plastic
bottled water and soft drinks at our offices

Using
Local Suppliers
for our corporate events

FSC/PEFC
certified corrugated boxes & recycled paper

Returning
Glass Milk Bottles
to the supplier for re-use and recycling

Separating waste for
100% Recycling
into Waste from Electronic & Electrical
Equipment (W3E), Plastic, Glass, Paper &
General Waste

Providing high quality
Reusable Drinking Flasks
to our colleagues, partners and users

Electric charging points
for our Electric & Plug-in Hybrid Electric Vehicles

Researching the usage of
Mixed Materials
specifically metals and plastics with a goal of
using the portion of recycled raw materials in our
future products
